PROFESSIONAL EXPERIENCE

BINUS UNIVERSITY SOFTWARE LABORATORY CENTER

Kemanggisan, Jakarta Barat

Network Administrator and Technical Support Staff

FEBRUARY 2026 - PRESENT

- Maintained a **Kubernetes cluster** serving **100+** internal users with **99.99%** uptime, including **implementing secrets management** to securely handle credentials and sensitive configuration.
- Managed **network infrastructure** across **Cisco switches** and **MikroTik routers**, ensuring **reliable connectivity** for daily operations.
- Built and secured a **multi-environment CI/CD pipeline** across development, staging, and production with **automated testing**, **automated image scanning** and **dependency checks** to deliver **stable, vulnerability-free releases to production**.

Software Laboratory Assistant

AUGUST 2024 - JANUARY 2026

- Qualified to teach **Docker**, **Kubernetes**, and **Terraform** on **Azure**, covering **containerization**, **orchestration**, and **infrastructure-as-code** on a major cloud platform.
- Taught **programming** and **computer science courses** to over 200 undergraduate students.
- Developed five technical projects through an intensive training program with work spanning **game development**, **networking systems**, and **web, desktop, and mobile applications**.

PROJECTS

Debyut: Engineered a **Kubernetes**-based event booking platform with **Svelte**, **Golang** microservices, **Postgres**, capable of **livestreaming** and handling **1000 concurrent booking processes**.

Twitter/X Clone: Built a **social media platform** with **Go** microservices and **Svelte**, using **gRPC** for **inter-service communication**, **Redis** for **caching**, and **Docker** for **containerized deployment**.

PlanIt: Built an event planner platform with **.NET** and **RabbitMQ**, leveraging **asynchronous message queues** to **process registration workflows reliably under load**.

EDUCATION

BINUS UNIVERSITY

Kemanggisan, Jakarta Barat

Bachelor of Computer Science, GPA: 3.42/4.00

2023-2027

SKILLS

Languages: Go, Java, C#, Rust, TypeScript, Python

Backend: Spring Boot, .NET, NestJS, Rocket

Frontend: React, Svelte, SvelteKit

AI / ML: LLMs, RAG, Embeddings, Vector Databases

DevOps & Infrastructure: Linux, Azure, Terraform, Ansible, Docker, Kubernetes, GitHub Actions

ACHIEVEMENTS

Nominated for Best Performing Assistant: Recognized among top-performing software laboratory assistants for the 2024/2025 academic year.
