PROFESSIONAL EXPERIENCE

BINUS UNIVERSITY SOFTWARE LABORATORY CENTER

Kemanggisan, Jakarta Barat

Network Administrator and Technical Support Staff

FEBRUARY 2026 - PRESENT

- Wrote **unit and load tests** for a maintained application to **ensure reliability** and **performance under load**.
- Maintained a **Kubernetes cluster** serving **100+ internal users** with **99.99% uptime in production**.
- Maintained **internal apps** used to **manage computer labs** across 7 campuses and **practicum data**.

Software Laboratory Assistant

AUGUST 2024 - JANUARY 2026

- Qualified to teach **Docker, Kubernetes, and Terraform** on **Azure**, covering **containerization, orchestration, and infrastructure-as-code** on a major cloud platform.
- Taught **programming and computer science courses** to over **200** undergraduate students.
- Developed five technical projects through an intensive training program with work spanning **game development, networking systems, and web, desktop, and mobile applications**.

BINUS UNIVERSITY IT DIVISION

Kemanggisan, Jakarta Barat

AI Application Developer Intern

JANUARY 2026 – JULY 2026

- Integrated a **RAG pipeline** into an existing thread discussion generation system, replacing full-context prompting with **targeted retrieval**.
- **Cut** token usage by **90%** with **no measurable increase in hallucination**.
- Designed an **LLM-as-a-judge evaluation system** to measure **coverage, coherence, and faithfulness** across generated threads.

PROJECTS

Debut: Engineered a **Kubernetes**-based event booking platform with **Svelte, Golang** microservices, **Postgres**, capable of **livestreaming** and handling **1000 concurrent booking processes**.

Cavent: Engineered a **campus event managing platform** with **React, Golang** monolith, **Postgres**, capable of **handling massive traffics**.

Twitter/X Clone: Built a **social media platform** with **Go** microservices and **Svelte**, using **gRPC** for **inter-service communication**, **Redis** for **caching**, and **Docker** for **containerized deployment**.

PlanIt: Built an event planner platform with **.NET** and **RabbitMQ**, leveraging **asynchronous message queues** to **process registration workflows reliably under load**.

EDUCATION

BINUS UNIVERSITY

Kemanggisan, Jakarta Barat

Bachelor of Computer Science, GPA: 3.42/4.00

2023-2027

SKILLS

Languages: Go, Java, C#, Rust, TypeScript, Python

Backend: Spring Boot, .NET, NestJS, Rocket

Frontend: React, Svelte, SvelteKit

AI / ML: LLMs, RAG, Embeddings, Vector Databases

DevOps & Infrastructure: Linux, Azure, Terraform, Ansible, Docker, Kubernetes, GitHub Actions

ACHIEVEMENTS

Nominated for Best Performing Assistant: Recognized among top-performing software laboratory assistants for the 2024/2025 academic year.
